B210 SPARE PART CLAMPING MOTOR CIRCUIT BOARD

This circuit board controls the clamping system in the 4 Point Bending Machine MatCivTest has reengineered these circuit boards with additional capacity in the components that typically fail on the original design.

To Differentiate the design the MatCivTest products are RED in colour and branded MatCivTest

Motor Assembly Overview

To keep the parts cost lower we sell the motor and gearbox separately without other parts.

The motor must include the plastic cover . If your old cover is returned to us then we will reuse it.

The motors are assembled and tested with a new connector and internal resistors

Part number	Description
101-B0091-02KIT	Motor and gearbox includes wiring, new connector and internal resistors
101-B0091-03	Mounting Flange
101-B0091-04	Drive adapter
101-B0091-06	Plastic Cover
